

BEFORE THE BOARD OF OIL, GAS AND MINING  
DEPARTMENT OF NATURAL RESOURCES  
in and for the STATE OF UTAH

-----

IN THE MATTER OF THE APPROVAL OF	)	
THE NOTICE OF INTENT AND RECLAMATION	)	ORDER TO SHOW CAUSE
PLAN SUBMITTED BY McFARLAND AND	)	ACT/045/010
HULLINGER, CRYSTAL MINE, TOOELE	)	
COUNTY, UTAH.	)	

-----

THE STATE OF UTAH TO ALL OPERATORS, TAKERS OF PRODUCTION, MINERAL  
AND ROYALTY OWNERS, AND PARTICULARLY ALL PERSONS INTERESTED IN TOWNSHIP  
6 SOUTH, RANGE 4 WEST, AND RANGE 3 WEST, TOOELE COUNTY, UTAH.

Notice is hereby given that tentative approval was given to McFarland  
and Hullinger by the Utah Division of Oil, Gas and Mining to commence  
open pit limestone mining on portions of Section 12, Township 6 South,  
Range 4 West, and Section 7, Township 6 South, Range 3 West, Tooele County,  
Utah. The name of the mine is the Crystal Mine and the persons representing  
the company in this matter are Messers. McFarland and Hullinger, Box 238,  
Tooele County, Utah 84074.

McFarland and Hullinger have fulfilled obligations under the Mined  
Land Reclamation Act of 1975 (Section 40-8, Utah Code Annotated, 1953 as  
amended) and will employ the following mining and reclamation practices  
on 17.6 acres which comprise the land affected. Legal access to the land  
affected is by ownership or lease of unpatented mining claims.

During Operations:

1. Topsoil will be stockpiled and protected from erosion for the life of the mine.
2. Blasting of rock will occur and warning signs will be posted along the adjacent public road at each end of the mining operation.
3. Mining will be conducted in a safe and orderly fashion.
4. No surface facilities or buildings will exist onsite.

After Operations:

1. All requirements of Rule M-10 will be met except for the two areas for which variances may be needed and are therefore requested:
  - a. Highwalls of solid rock may need to be left as a result of rock removal. However, if the gradient can be modified to facilitate revegetating the surface, the slopes will be modified to a lower gradient.

ORDER TO SHOW CAUSE  
ACT/045/010

b. Solid rock outcrops will not be revegetated.

2. Areas between the perpendicular rock walls will be modified to lessen gradient and retain moisture.

3. Areas disturbed at the base of the steep hill will be regraded, topsoiled, mulched and revegetated with acceptable species for the postmining land use.

A reclamation performance bond has been posted.

Any person or agency aggrieved by this tentative decision is hereby requested to submit written protest within 30 days from February 7, 1980 to the Division of Oil, Gas and Mining, 1588 West North Temple, Salt Lake City, Utah 84116, setting forth factual reasons for the complaint, and thereafter, at a time and place heretobe established, appear before the Board of Oil, Gas and Mining to show cause, if any there be, why this plan should not be approved.

DATED this 22nd day of January, 1980.

STATE OF UTAH  
BOARD OF OIL, GAS AND MINING
